Diversified Ceramics Corporation was founded in 1976. Our manufacturing facility is located in Alvin Texas, a suburb of Houston. During the past thirty-nine years our company has grown from manufacturing only two coffee mugs to producing over 250 items in more than 57 different colors.

Diversified Ceramics specializes in standard ovenware products, and also excels in the manufacturing of custom items for many chain accounts. Our new 3D printers have expanded our capability to design and produce new product shapes more quickly and efficiently.

All of our products are vitrified china, single-fired and lead-free. As an American china manufacturing company, Diversified Ceramics has based its success on exceptional quality, service and value.

We thank you for using our products and we look forward to supplying your china needs in 2015 and beyond.
