AMERICOAT® Plus :	Some pans are available plain, but most are available with AMERICOAT® Plus , a silicone bakery release pan coating that conforms to FDA standards. AMERICOAT® Plus helps baked products release from the pan easily when the glaze is fresh. Brand new glazed pans work best after first lubricating the pan's baking contact surfaces. As the glaze wears off, pans may need to be oiled more frequently. After the glaze finally wears off, the pan may have to be oiled with every use. For more information about cleaning and re-glazing your pans, visit www.pan-glo.com .
DURASHIELD®:	DURASHIELD® is a revolutionary non-stick coating that also saves you money by keeping your pans and baking areas cleaner and safer. For more information on DURASHIELD® pans, contact your local Chicago Metallic representative.
